Interface 1: Financial Tracker

	Strongly disagree				Strongly Agree
1) I found this interface easy to use					X
2) I think I would use this interface regularly				X	
3) I think I would need some help while using this interface		X			
4) I found the various functions easy to find				X	
5) I found the design of the interface consistent				X	
6) I imagine people will learn to use this interface quickly					X
7) I felt confident using the interface				X	

Did you find any problems?

No this app was very good, very visually appealing and I knew what to do easily. I liked the different ways you can interact with the expense tables and different graphs.

What would you change?

I would add customization features like maybe different themes or custom themes to make it more fun to use and interesting.

Any Final comments?

The aesthetics and design of the page is very nice and simple to navigate but it could use with some extra features or pages.

Interface 2: Project Planning

Statement	Strongly disagree				Strongly Agree
1) I found this interface easy to use		X			
2) I think I would use this interface regularly		X			
3) I think I would need some help while using this interface				X	
4) I found the various functions easy to find		X			
5) I found the design of the interface consistent				X	
6) I imagine people will learn to use this interface quickly	X				
7) I felt confident using the interface	X				

Did you find any problems?

This Interface was good but it was a bit confusing to use at some points, I could see how a less experienced person would find it a bit hard to use

What would you change?

I would add a guide that described everything that is on the page in real time so all the different functions are clear on what they do

Any Final comments?

This would definitely be something I want to use to help me track my tasks but the complexity puts me off.

Interface 3: Cooking Companion

	Strongly disagree				Strongly Agree
1) I found this interface easy to use				X	
2) I think I would use this interface regularly					X
3) I think I would need some help while using this interface		X			
4) I found the various functions easy to find					X
5) I found the design of the interface consistent					X
6) I imagine people will learn to use this interface quickly					X
7) I felt confident using the interface					X

Did you find any problems?

This is the best interface out of all of the, it has so many different options and looks very clean. I like the dark and high contrast modes in the settings and the whole app looks very professional on my phone.

What would you change?

I don't really know what I would change because it is already quite good and has a lot of functions and cooking options

Any Final comments?

This was a very developed app compared to the other ones and I would definitely use this myself for cooking recipes
