Interface 1: Financial Tracker

	Strongly disagree				Strongly Agree
1) I found this interface easy to use					x
2) I think I would use this interface regularly		x			
3) I think I would need some help while using this interface	x				
4) I found the various functions easy to find					x
5) I found the design of the interface consistent		x			
6) I imagine people will learn to use this interface quickly					x
7) I felt confident using the interface					x

Did you find any problems?

In terms of ease of use this interface is very good, however there isn't much functionality. I think a lot more features could have been added and some of the help buttons are not functional

What would you change?

I would change the idea of recommendations. I like the idea of the graphs but there needs to be another screen that provides some output.

Any Final comments?

It is ok, good in terms of usability but not much to judge it on.

Interface 2: Project Planning

Statement	Strongly disagree				Strongly Agree
1) I found this interface easy to use				X	
2) I think I would use this interface regularly					X
3) I think I would need some help while using this interface		X			
4) I found the various functions easy to find					X
5) I found the design of the interface consistent					X
6) I imagine people will learn to use this interface quickly			X		
7) I felt confident using the interface				X	

Did you find any problems?

I liked this application a lot more. It had a good purpose and there isn't much wrong.

What would you change?

Some of the features may be a bit complex for some users, however I think that the functionality has been labelled appropriately and there is a dropdown just for help.

Any Final comments?

N/A

Interface 3: Cooking Companion

	Strongly disagree				Strongly Agree
1) I found this interface easy to use				X	
2) I think I would use this interface regularly					X
3) I think I would need some help while using this interface			X		
4) I found the various functions easy to find					X
5) I found the design of the interface consistent		X			
6) I imagine people will learn to use this interface quickly		X			
7) I felt confident using the interface				X	

Did you find any problems?

This application was very interesting. There is even more functionality than the last, however at some points its too much, and not all aspects were explained well.

What would you change?

I would add a guide through tooltips or some other aid to show users what to do, otherwise they might be completely lost if they are not tech literate.

Any Final comments?

I really enjoyed using this interface but it does need some work. I found the 2nd interface to be the most polished.
